Chorus II Portfolios – one billion in assets - April 18, 2012

Desjardins Group proudly announces that its investment solution, Chorus II Portfolios, has reached a billion dollars of assets under management.

Supported by the trust and expertise of the Desjardins caisse network's financial advisors, these results clearly illustrate that investors were waiting for these portfolios launched on the market last fall.

The portfolios were meticulously designed to meet the expectations and priorities of high net worth and demanding clients with \$100,000 or more to invest.

Unique on the market, Chorus II Portfolios are offered in two versions : Corporate Class for non-registered accounts, and Trust Class for registered accounts. The selection, comprised of six portfolios, fine-tunes the investment strategy for all investor profiles.

For additional information on the benefits of this investment solution, or to check whether or not this solution is suitable for you, refer to the section [Chorus II](#).
