

# Desjardins Alternative Long/Short Equity Market Neutral ETF

LOOKING FOR A UNIQUE INVESTMENT SOLUTION?

We may have just what you need! The **Desjardins Alternative Market Neutral Exchange Traded Fund (ETF)** gives you access to sophisticated investment strategies typically reserved for institutional investors.

This ETF aims to generate stable returns independently of movements in the stock markets and other asset classes.

## What's unique about the Desjardins Alternative Market Neutral ETF?

Our investment professionals analyze the market and select paired companies, generally from the same industry. By combining them through diversified long and short positions, the portfolio seeks to deliver stable return potential regardless of whether the markets are up or down.

### The strategy targets:

**Returns not correlated** with other asset classes, allowing you to diversify your portfolio

**Return potential** coupled with low risk

**Capital protection** with sound risk management

**Desjardins Global Asset Management (DGAM) is one of the largest portfolio managers in Canada<sup>1</sup>**

**\$71.2B** in assets  
under management

**+44** investment  
professionals

**+19** years  
of experience

**+19** ETFs

**Desjardins**  
Wealth Management  
Global Asset Management

Desjardins Exchange Traded Funds are not guaranteed, their value fluctuates frequently and their past performance is not indicative of their future returns. Commissions, management fees and expenses may all be associated with an investment in exchange traded funds. Please read the prospectus before investing. Desjardins Global Asset Management Inc. is the manager and portfolio manager of Desjardins Exchange Traded Funds. These funds are offered by registered dealers.

The Desjardins Alternative Long/Short Equity Market Neutral ETF is an alternative mutual fund. It has the ability to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific strategies that differentiate this ETF from other types of mutual funds include the use of cash borrowings for investment purposes, short sales and derivatives. Leverage amplifies gains and losses. While the strategies are used in compliance with the ETF's investment objectives and strategies, they may, in some market conditions, accelerate your investment's rate of depreciation.
